Self-check — Value Stream Map and Takt Time

Tick each item you have completed. Any blank is a gap to close before your group presents at the debrief.

#	Criterion	Evidences	✓
1	Every step carries both a process time and the wait time after it	MEASURE	
2	Lead time equals the sum of all process and wait times	MEASURE	
3	Process cycle efficiency calculated as VA time / lead time	MEASURE	
4	Takt time = available working time / customer demand	MEASURE	
5	Takt time expressed per unit	MEASURE	
6	Bottleneck step identified by comparing cycle time to takt time	MEASURE	

Debrief check

Your lead time equals the sum of all process and wait times, and takt time is expressed per unit.
